

Environmental Policy:

All of the team here at The Greener Earth Project are committed to limiting the environmental impact of our company. We have the following principles.

Policy Principles:

1. We don't believe that tree planting should be used to offset carbon emissions. We believe that tree planting should be used as part of reforestation, and to help increase biodiversity.
2. We will keep as many documents digitally as possible to avoid printing and paper usage.
3. We will regularly review how many digital files and emails we have saved and commit to keeping as few as possible to avoid unnecessary carbon emissions due to excess data storage.
4. We commit to holding as many of our meetings digitally to avoid vehicle emissions. Where an in-person is necessary we support the use of public transport to travel to, and from the meeting.
5. We will continue to evaluate the impact we are having on the planet and are committed to being as transparent in what we do and how we do it.

The whole of The Greener Earth Project team is fully committed to this policy.
